---

To whom it may concern,

We are Celine Dion's tour producers and have staged performances in Europe, Asia, Australia, and North America.

We have a longstanding relationship with Scène Ethique and their most recent project for us was the construction (in conjunction with Smartvision) of a heart-shaped portable stage for the Celine Dion World Tour, which started in August of 1998 and has travelled throughout North America, Japan, Hong Kong and Europe. We are currently in Europe and will be returning to North America for the third time on this tour alone.

The set that was constructed for this tour is our most ambitious stage project yet and ranks as one of the three largest touring stages of 1998. We highly recommend Scène Ethique as their staff shows a strong work ethic and are trained experts in their field.

Kind regards,
